

# New energy storage equipment and energy storage power supply in the industrial park

## Overview

---

How can big data industrial parks improve energy storage business model?

Combined with the energy storage application scenarios of big data industrial parks, the collaborative modes among different entities are sorted out based on the zero-carbon target path, and the maximum economic value of the energy storage business model is brought into play through certain collaborative measures.

What are the advantages of hybrid energy storage in industrial parks?

The advantages of the hybrid energy storage system in industrial parks were also discussed in terms of sustainable development, climate change mitigation, social impact, and other aspects.

How can energy storage benefits be improved?

By adjusting peak and valley electricity prices and opening the FM market, energy storage benefits can be greatly improved, which is conducive to promoting the development of zero-carbon big data industrial parks, and technical advances are beneficial for reducing investment costs.

Do Peak-Valley power prices affect energy storage projects?

This section sets five kinds of peak-valley price difference changes: 0.1 decreased, 0.05 decreased, 0.05 increased, 0.1 increased, investigating the economic influence of altering peak-valley power prices on energy storage projects, as shown in Fig. 8.

What is a synergy with energy storage?

The synergy with energy storage as the main body is to balance supply and demand and improve power quality. Collaborative measures include power-side energy storage, grid-side energy storage, and user-side energy storage. Table 6. Source grid load storage coordination measures.

What are the economic indicators of big data industrial park?

Based on the characteristics of the source and load of big data industrial park, this paper selects typical income and cost indicators, including financial net present value, internal rate of return, and dynamic payback period of investment, to measure the economy of three scenarios of big data industrial park .
