

New energy storage lithium battery news

Overview

Hithium has announced its lithium-ion and sodium-ion battery energy storage system (BESS) for supporting data centres, while Storion Energy has secured its first vanadium electrolyte customer.

Hithium has announced its lithium-ion and sodium-ion battery energy storage system (BESS) for supporting data centres, while Storion Energy has secured its first vanadium electrolyte customer.

Tesla announced its new integrated 20MWh battery energy storage system (BESS) solution, the Tesla Megablock, on 8 September in Las Vegas, US. Energy-Storage.news Premium speaks with Ryan Hledik, Principal at the Brattle Group, and Lauren Nevitt, Senior Director of Public Policy at Sunrun, on the.

China aims to install over 180 million kW of new energy storage capacity by 2027, driving about RMB 250 billion (\$35 billion) in direct project investment. CATL shares in Hong Kong surged as much as 10 percent to HK\$476.8, hitting a record high since its May 20 listing there. CATL (HKG: 3750, SHE:.

China's new energy storage capacity exceeded 100 GW by June 2025, with total installations reaching 164.3 GW, surpassing pumped hydro additions amid accelerating deployments and changing market dynamics, according to the China Energy Storage Alliance (CNESA). China's new energy storage market.

China, which already boasts the world's largest energy-storage capacity, is set to nearly double that level by 2027, with an anticipated investment of 250 billion yuan (US\$35 billion), according to Beijing's latest action plan. As outlined in the action plan, China's "new-energy storage system".

New energy storage lithium battery news

California battery facility fire raises concerns over energy storage

Following a lithium-ion battery fire at the Moss Landing plant in Monterey County in California, communities nationwide are expressing concerns about hosting similar plants.

New energy storage to push batteries for electric aviation, grid ...

Although water-in-salt aqueous electrolytes have a 3.0V stability window, they are still incompatible with high-energy lithium metal or graphite anodes, another key component of ...

[New Lithium Battery Technology Set to Disrupt ...](#)

A new set of cathode, anode and electrolyte technologies are set to deliver the next generation of batteries. Lithium-ion batteries became the ...

[Lithium-Ion Batteries Latest news & Tech Article](#)

5 ???· Read the latest news and expert articles on Lithium-Ion Batteries, brought to you by the editors of The Battery Magazine - The Battery Magazine

[A Review on the Recent Advances in Battery ...](#)

In general, energy density is a key component in battery development, and scientists are constantly developing new methods and technologies to make ...

[What's next for batteries in 2023 , MIT Technology ...](#)

Lithium-ion batteries are also finding new applications, including electricity storage on the grid that can help balance out intermittent renewable ...

Lithium Battery Technology Innovation: Ushering in A New Era Of Energy

Lithium Battery Technology Innovation: Ushering in A New Era Of Energy Storage Apr 17, 2025
Leave a message In the grand wave of global energy transformation, ...

Energy Storage News , Utility Dive

5 ???· Energy Storage The proliferation of energy storage in everything from utility-scale batteries to electric vehicles is a driving force in the transition to a ...

TDK claims insane energy density in solid-state battery ...

TDK claims insane energy density in solid-state battery breakthrough Apple supplier says new tech has 100 times the capacity of its current batteries.

A Review on the Recent Advances in Battery Development and Energy

In general, energy density is a key component in battery development, and scientists are constantly developing new methods and technologies to make existing batteries more energy ...

Beyond lithium: Alternative chemistries are promising, ...

Alternative technologies to lithium-ion are unlikely to oust the incumbent anytime soon, writes Anh Vu of Clean Energy Associates (CEA). ...

Big batteries that send clean energy to the grid soar in 2024 , AP News

A worker does checks on battery storage pods at Orsted's Eleven Mile Solar Center lithium-ion battery storage energy facility, Feb. 29, 2024, in Coolidge, Ariz. (AP ...

[Biggest projects in the energy storage industry in 2024](#)

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

China new energy storage tops 100 GW as lithium overtakes ...

China's new energy storage market reached a milestone in the first half of 2025, according to a report by CNESA at the Western Energy Storage Forum in Hohhot, Inner ...

Chinese researchers invent new material for solid lithium batteries

According to the research team, all-solid-state lithium batteries are a new generation of energy storage technology that can store electricity from wind and solar energy.

Lithium sulfur battery breakthrough hits 25,000 cycles, ...

25,000 charge cycles, 80% capacity achieved in lithium-sulfur battery breakthrough The new battery showed impressive performance, ...

7 New Battery Technologies to Watch

Most battery-powered devices, from smartphones and tablets to electric vehicles and energy storage systems, rely on lithium-ion battery technology. Because lithium-ion ...

[BloombergNEF: Stationary storage installations surge ...](#)

With expanding market opportunities and declining costs stationary battery energy storage installations are surging. Battery makers are ...

[China aims to nearly double battery storage by 2027 ...](#)

5 ???· China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan ...

Modular design architecture with smart protection can mitigate ...

The critical safety risk for energy storage systems based on lithium-ion (Li-ion) batteries is thermal runaway. It occurs when the heat generated exceeds the heat dissipated, ...

Innovative Lithium-Air Battery Design Poised to Increase Energy Storage

A new rechargeable lithium-air battery potentially has four times greater energy density than a traditional lithium-ion battery.

Battery Storage in California Meets New Regulatory Hurdles: ...

Finally, as fire safety concerns associated with lithium-ion technology batteries continue to be addressed, permitting hurdles for battery storage projects should ease. An ...
