

New energy storage parts inspection and ordering

Overview

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Are independent energy storage stations a good investment?

This does not augur well for the market in terms of long-term competition. There will be safety risks associated with excessive cost control and an indifference to quality. Independent energy storage stations enjoy good long-term prospects, though this segment is sluggish in the short term.

What are the application scenarios for energy storage systems?

There is an extensive range of application scenarios for industrial and commercial energy storage systems, including industrial parks, data centers, communication base stations, government buildings, shopping malls and hospitals.

Who are the members of the Electric Transportation & Energy Storage Association?

It was established under the concerted decision of the CEC Board and implements the Constitution of CEC. The Electric Transportation and Energy Storage Association currently has more than 100 member firms, and State Grid Smart Internet of Vehicles Technology Co., Ltd. and GCL (Group) Holdings Co., Ltd. are the executive vice president firms.

What are the different types of energy storage technologies?

Depending on how energy is stored, storage technologies can be broadly divided into the following three categories: thermal, electrical and hydrogen

(ammonia). The electrical category is further divided into electrochemical, mechanical and electromagnetic (Figure 2).

Why is investor participation important in the energy storage industry?

Investor participation is beneficial for the development of the energy storage industry. Facing trends, they should keep a cool head in assessing business models to identify high-quality segments and targets.
