

Nickel manganese cobalt battery tender price in Cyprus 2030

Overview

Here, Scope 3 Magazine takes a closer look at key materials including lithium, nickel, cobalt and manganese as McKinsey reveals the complexities of ensuring a sustainable supply chain.

Here, Scope 3 Magazine takes a closer look at key materials including lithium, nickel, cobalt and manganese as McKinsey reveals the complexities of ensuring a sustainable supply chain.

As the latest analysis from McKinsey shows, the demand for these materials may soon outstrip base-case supply, posing significant challenges such as shortages, price volatility and the need for heavy investments. Here, Scope 3 Magazine takes a closer look at key materials including lithium, nickel.

Lithium-ion (Li-ion) EV battery prices have decreased dramatically over the past few years, mainly due to the fall in prices of critical battery metals: Lithium, cobalt and nickel. For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024.

McKinsey's report suggests the possibility of a slight shortage in 2030 as the battery sector continues to vie with steel and other sectors for Class 1 nickel. While the share of cobalt in battery chemistry mix is expected to decrease, the absolute demand for cobalt for all applications could rise.

Despite the decreasing role of cobalt in battery technology, McKinsey forecasts a 7.5% annual rise in cobalt demand until 2030. The volatility in cobalt prices and ethical sourcing concerns are driving the industry towards greater transparency and sustainability in cobalt procurement. Although.

The global nickel manganese cobalt battery market was estimated at USD 30.5 billion in 2024. The market is expected to grow from USD 35.6 billion in 2025 to USD 123.4 billion in 2034, at a CAGR of 14.8%. Nickel manganese cobalt batteries are generally used as a rechargeable battery in portable.

Demand for battery-grade nickel is expected to surge, tripling by 2030, according to Benchmark Mineral Intelligence. This growth will largely be due

to mid- and high-performance electric vehicles (EVs) in Western markets. A senior nickel analyst at Benchmark, Jorge Uzcategui, particularly noted. How big is the nickel manganese cobalt battery market?

The nickel manganese cobalt battery market size exceeded USD 30.5 billion in 2024 and is estimated to exhibit 14.8% CAGR between 2025 and 2034 driven by growth in renewable energy sector.

What drives the growth of nickel manganese cobalt (NMC) battery market?

This drives the growth of the nickel manganese cobalt (NMC) battery market. As the nickel manganese cobalt (NMC) batteries are widely used various government authorities have established favorable policies to ease the supply and regulate cost of minerals including Nickel and Cobalt.

Who are the key players in the nickel manganese cobalt (NMC) battery market?

Market players including CATL, Clarios, Exide Technologies, Tesla, Saft are the top 5 companies in the nickel manganese cobalt (NMC) battery market. The key 5 players hold nearly 40% of market share. Among these, CATL is one of the major share holding player in the market.

Will manganese demand outpace the demand for battery-grade materials?

Meanwhile, the supply of manganese is projected to grow moderately through 2030, but an increasing demand for battery-grade material is likely to outpace supply, requiring the development of new refineries.

Can battery manufacturers securing supply of essential battery raw materials by 2030?

Based on current market observations, battery manufacturers can expect challenges securing supply of several essential battery raw materials by 2030, McKinsey's report finds. Battery makers use more than 80% of all lithium that is mined today, and that share could grow to 95% by 2030.

How much does cobalt cost in 2022?

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.
