The new laws signed by Gov. Phil Murphy Friday direct regulators to expand community solar generation and offer incentives for large-scale battery storage plants. (Hal Brown for New Jersey Monitor) Gov. Phil Murphy signed two bills meant to boost renewable energy generation in New Jersey on Friday.

Tranche 1 is open to transmission-scale projects, including standalone storage, storage additions to existing solar, and solar-plus-storage resources. However, storage additions to existing solar and the storage component of any solar-plus-storage resource are only eligible if they do not and will.

In conjunction with a separate bill to increase community solar projects, New Jersey Gov. Murphy signed legislation into law that will increase the state's energy storage without new costs for ratepayers. New Jersey Gov. Murphy signed two bills into law expanding energy storage and community solar.

The state has set ambitious goals to increase the adoption of battery storage systems. Thus recognizing their vital role in grid reliability, reducing carbon emissions, and stimulating economic growth. The New Jersey Board of Public Utilities (BPU) has developed the New Jersey Energy Storage.

New Jersey has launched a statewide energy storage initiative aimed at providing incentives for the deployment of up to 2 GW of battery storage capacity by the end of the decade. A BESS project in Slate, USA. Image source: e-STORAGE. The New Jersey Board of Public Utilities (NJBPUB) said on.

Two laws signed by New Jersey Gov. Phil Murphy aim to dramatically expand

the state's community solar and storage incentive programs as the state searches for new generation sources to help meet a predicted energy shortfall. Two laws signed by New Jersey Gov. Phil Murphy (D) aim to dramatically.
