

Northern water storage

Overview

What new water storage projects are planned?

As population continues to boom in our service area, we're continuing to plan for future water storage projects to meet the growing demands with two new projects planned - the Northern Integrated Supply Project and Chimney Hollow Reservoir Project.

What does northern water do?

While our water projects keep our staff busy in day-to-day operations and future plans, Northern Water provides even more through monitoring weather and water quality data, tracking streamflows and reservoir levels, and providing water planning and efficiency information.

What is Northern Water & Save the Poudre?

Northern Water and Save the Poudre have reached a settlement to the lawsuit challenging the federal permit issued for NISP. Provides a secure water future for Northern Colorado Enhances recreation opportunities to encourage healthy, outdoor lifestyle Supports environmental and wildlife stewardship.

What is the northern integrated supply project?

Through the building of two new reservoirs in Northern Colorado, the Northern Integrated Supply Project will supply 15 Northern Front Range water providers with 40,000 acre-feet of new, reliable water supplies.

Why should northern water invest in creative strategies?

With a growing population and limited water supply, Northern Water must invest in creative strategies that meet future demands sustainably.

Will northern water deliver NISP by 2032?

Northern Water is on track to deliver NISP by 2032. Northern Colorado's future

water supply depends on NISP, and that's why this innovative water supply project has been so thoughtfully developed. Water supply projects are carefully reviewed by regulatory experts and require extensive permitting and approvals.
