

# **Oslo japan overseas energy storage project is it tiring to work on energy storage**

## Overview

---

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Can Eku Energy sell Hirohara Bess & eshi in Japan?

Kentaro Ono says that Hirohara BESS' tolling deal and the Eshi project's LTDA contract are two of three commercialisation pathways Eku Energy sees potential for in Japan. The third is a full merchant model. Ono says the developer wants to hold a diversified portfolio representing different risk and reward appetites for investment.

Can Eku Energy commercialise large-scale batteries in Japan?

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to commercialisation for large-scale batteries in Japan. The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS.

Does Eku Energy have a tolling agreement with Tokyo Gas?

The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS. Now under construction on the southern

island of Kyushu, Eku claimed its tolling agreement with utility Tokyo Gas was a first of its kind for the Japanese market that helped it to close financing in the summer of 2024.

Why is Tokyo launching a virtual power plant?

The push is reinforced by Tokyo's 2025 regulation requiring solar panels on new homes, and the launch of virtual power plant (VPP) programs—slated to begin in fiscal 2026—that will let households sell surplus energy to the grid.
