

# **Pcs intelligent energy storage controller test**

## Overview

---

What is a PC's power conversion system?

PCS is a high power density power conversion system for utility-scale battery energy storage systems (up to 1500 VDC). It is optimized for BESS integration into complex electrical grids and is based on our best-in-class liquid cooled power conversion platform, enabling greater scalability and efficiency. Key highlights.

What will I learn in a PC's testing course?

You will also learn about PCS performance testing, input/output feature testing, and protection testing to international regulations and requirements. This deep dive will include test items, test procedures, and test specifications. Already an AAC member?

.

Is PCS compatible with battery manufacturers?

Optimized for BESS integration into complex electrical grids, PCS is compatible with leading battery manufacturers. It is based on our best-in-class liquid cooled power conversion platform to provide you with greater efficiency, flexibility, performance, and scalability.
