

Percentage of energy storage capacity in south africa

Overview

How much energy storage capacity does South Africa have?

South Africa had 1,604.6kW of capacity in 2022 and this is expected to rise to 3,519.9kW by 2030. Listed below are the five largest energy storage projects by capacity in South Africa, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

Are solar power costs increasing in South Africa?

Renewable energy installed capacity and energy production are increasing in South Africa, but still constitute a small portion of the total capacity and energy mix. Concentrating solar power (CSP) costs are high and have more variability than wind and solar PV costs, which are both on a stable downward trend.

Does Scatec have a solar-plus-storage site in South Africa?

Scatec's Kenhardt solar-plus-storage site in South Africa (above), which went online at the end of 2023. Image: Scatec. Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.

What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How much thermal energy will South Africa produce in 2023?

The production of thermal energy in South Africa is expected to decline from 200.1 TWh in 2023 to 188.0 TWh in 2032.

How much electricity does Eskom produce in South Africa?

Eskom, the vertically integrated, state-owned power company, generates approximately 95 percent of electricity used in South Africa, as well as a substantial share of the electricity generated on the African continent. The utility ranks in the top 20 utilities worldwide by generation capacity and is the biggest producer of power in Africa.
