The Battery Energy Storage Systems (BESS) market in Poland is experiencing significant growth and transformation in Q1 2025. Key investments from major industry players, such as LG Energy Solution and Greenvolt Group, underscore a robust commitment to enhancing.

The 27th Enex Trade Fair, held on February 18-19, 2025, in Kielce, Poland, underscored the pivotal role of Battery Energy Storage Systems (BESS) in the nation's energy landscape (Targi Kielce). This year's event saw a significant presence of Tier 1 BESS Original Equipment Manufacturers (OEMs).

Poland's energy storage landscape has become a battleground between ambitious climate targets and practical grid economics. With 9GW of battery projects already permitted but only 10MW operational as of 2023 [6], the country's energy transition story reveals both promise and growing pains. Let's.

In 2023, Huawei was the leading energy storage manufacture in Poland with a market share of 19 percent. Sofar Solar and Pylontech were the second most used brands for electric storage units with a share of 13 percent each, followed by Solax with a market share of ten percent. [pdf] As we near 2025.

The Battery Energy Storage Systems (BESS) market in Poland is experiencing significant growth and transformation in Q1 2025. Key investments from major industry players, such as LG Energy Solution and Greenvolt Group, underscore a robust commitment to enhancing Poland's energy storage capacity.

Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects. The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted.

Poland's power sector is transitioning away from coal, with the share of coal-fired power generation in the country expected to fall from 90% in 2010 to 55% in 2025 and further down to 20% by 2030, according to the S&P Global Commodity Insights Planning Case released in January. Integrating.
