Overview

Which energy storage integrator is the best?

Fluence has a track record of being the integrator of choice for ground-breaking energy storage projects. Last month, it was revealed that the US-headquartered integrator had been selected by Tilt Renewables to deliver the 100 MW / 200 MWh Latrobe Valley battery energy storage system (BESS) located south of Morwell in Victoria.

Does Wärtsilä have a strong energy storage & optimisation pipeline?

The agreement will support Wärtsilä's "strong pipeline of energy storage & optimisation orders across key markets", a company statement said. Wärtsilä currently has more than 3.5GW / 7GWh of energy storage capacity awarded, contracted, or in deployment across six continents.

Can a medium-voltage power grid be integrated into a lower distribution grid?

Medium-voltage 11 kV BESSs larger than 1 MWh/MW are integrated into the lower distribution grid (Feehally et al., 2016). Traditional integration of 200-300 cells in series yields a DC-link voltage of 700-1000 V, requiring a line-frequency transformer for medium-voltage power grid integration (Huang and Qahouq, 2014, Pires et al., 2014).
