

Recruiting energy storage installation workers

Overview

Where are our recruitment offices located?

We operate across 60 interconnected recruitment offices across Asia Pacific, the Caspian region, Europe, Africa, the Middle East, and North and Latin America. This includes three super hubs in Houston, Manchester, and Singapore. Our connected infrastructure ensures unique project insights and agile green energy recruitment.

How do alternative energy recruiters work?

For clients who need to fill a critical role within their organisation, our alternative energy recruiters work with you to understand your unique requirements and identify candidates who meet those criteria. We handle everything from sourcing and screening to negotiating offers and onboarding. Board and renewable energy executive search.

How many GWh of energy storage are there in 2022?

The United States installed approximately 11.1 GWh of energy storage onto the electric grid in Q1-Q3 2022, an 88% jump over 2021 as a result of high levels of residential deployment and grid-scale deployment.

Why do we need skilled professionals in the green energy sector?

As the world shifts towards more sustainable forms of energy, the demand for skilled professionals in the green energy sector is on the rise. The energy transition needs talented professionals passionate about creating a cleaner future.

Recruiting energy storage installation workers
