

Remote solar battery

Overview

What is a remote solar power system?

Solar Illuminations' standalone remote solar power systems are great renewable energy solutions for powering small electronics in remote sites, or areas difficult to access grid power.

What is an off-grid remote solar power system?

These off-grid standalone remote solar power systems can be DC or AC power with the use of a power inverter. They can be used as an backup power, and emergency power for when/if grid tie power fails, or can be used as a permanent energy source for remote locations.

What is the Remote Power System?

The Remote Power System from Mr. Solar® is a kit designed to provide AC power to remote cabins or off-grid locations. It is specifically designed for three mid-size 72 cell panels (24V).

What applications can a solar power kit be used for?

Our power kits can be used for many applications including Wi-Fi hubs, Communications systems, CCTV / Security Camera systems, LED Lighting, Electric Gates, and other lower power consuming electronics. These off-grid standalone remote solar power systems can be DC or AC power with the use of a power inverter.

Do I need to charge my solarcell remote?

Charging is convenient either way, whether plugged and unplugged.² ² If the SolarCell remote is at 0%, USB-C charging is required. Innovation and sustainability go hand in hand, as the remote design incorporates recycled materials from the past, so you can help reduce the environmental impact.³

Does the solarcell remote work with USB-C?

Your SolarCell Remote™ is designed to trickle-charge with both indoor and outdoor light, or through its USB-C fast-charging port. Charging is convenient either way, whether plugged and unplugged.^{2 2} If the SolarCell remote is at 0%, USB-C charging is required.
