## Overview

---

Samsung's latest solid-state battery technology will power up premium EVs first, giving them up to 621 miles of range. The new batteries—which promise to improve vehicle range, decrease charging times, and eliminate risk of battery fires—could go into mass production.

Samsung's latest solid-state battery technology will power up premium EVs first, giving them up to 621 miles of range. The new batteries—which promise to improve vehicle range, decrease charging times, and eliminate risk of battery fires—could go into mass production.

In March 2022, SAMSUNG SDI started its launch of Korea's first all-solid-state battery (ASB) pilot line, a 6,500-square-meter 'S-line', at the SDI R&D Center located in Suwon. In 2023, SAMSUNG SDI supplied samples of ASB produced at the S-line to customers and aims to mass-produce them in 2027.

Samsung's latest solid-state battery technology will power up premium EVs first, giving them up to 621 miles of range. The new batteries—which promise to improve vehicle range, decrease charging times, and eliminate risk of battery fires—could go into mass production as soon as 2027. Multiple.

On March 9 in London, researchers from the Samsung Advanced Institute of Technology (SAIT) and the Samsung R&D Institute Japan (SRJ) presented a study on high-performance, long-lasting all-solid-state batteries to Nature Energy, one of the world's leading scientific journals. Compared to widely.

Samsung has unveiled a breakthrough in electric vehicle (EV) battery technology with its new solid-state battery, promising to dramatically reshape the EV landscape. Announced at SNE Battery Day 2024 in Seoul, the battery boasts a range of up to 600 miles on a single charge, can recharge to 80% in.

Samsung Electro-Mechanics has developed an ultra-compact all-solid-state battery tailored for wearable devices. The innovative battery is an oxide-based small all-solid-state battery with an industry-leading energy density of 200 Wh/L. This has achieved an equivalent level of energy density to.

Samsung SDI is leading the way in solid-state battery (SSB) technology, making significant advancements that could transform the electric vehicle (EV) industry. By replacing traditional lithium-ion batteries with next-generation solid-state batteries, Samsung SDI aims to overcome key challenges.
