

# Seiko watch energy storage

## Overview

---

A Seiko Kinetic watch does not use a regular battery. It generates kinetic energy from the movement of your wrist. This energy is stored in the Kinetic Electricity Storage Unit (K.E.S.U.). The watch runs without battery replacement. Regular wear keeps it charged, making maintenance simple and efficient.

## Seiko watch energy storage

---

### [Mechanism and Recharging , Seiko Watch Corporation](#)

Light energy received by a solar cell (solar cell unit under the dial) is converted into electronic energy. The energy is stored in the rechargeable battery and is ...
