

Shuangjie electric is an energy storage

Overview

Shuangjie Electric's transformer plays a multifaceted role in energy storage by converting excess electrical energy into storable formats while ensuring reliability in energy delivery.

Shuangjie Electric's transformer plays a multifaceted role in energy storage by converting excess electrical energy into storable formats while ensuring reliability in energy delivery.

In a world increasingly reliant on sustainable energy, Shuangjie Electric stands out for its pioneering approach to energy storage via public transformers. The growing demand .

At the 2024 Asia Power and Energy Exhibition, which opened on the 8th, Fadhila revealed that as of June, Malaysia has saved 8769 gigawatt hours of electricity, worth over 2.2 billion ringgit, and plans to reduce 38 million tons of carbon dioxide emissions by 2025.

As fossil fuel generation is progressively replaced with intermittent and less predictable renewable energy generation to decarbonize the power system, Electrical energy storage (EES) technologies are increasingly required to address the supply-demand balance challenge over a wide range of timescales.
