

# **Silicon-magnesium molten energy storage technology**

## Overview

---

Donald Sadoway of materials science and engineering, David Bradwell MEng '06, PhD '11, and their collaborators have developed a novel molten-metal battery that is low-cost, high-capacity, efficient, long-lasting, and easy to manufacture—characteristics that make it ideal for storing electricity on power grids today and in the future.

## Silicon-magnesium molten energy storage technology
