

Sodium ion battery storage tender price in Brazil 2030

Overview

Cost projections: Na-ion cells will drop to \$40-50/kWh by 2030 —half today's lithium prices—making them unbeatable for grid storage . Deploy Na-ion in solar storage, UPS systems, and agro-industrial microgrids where weight is less critical than cost and cycle life.

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be.

The battery market in Brazil is expected to reach a projected revenue of US\$ 6,058.9 million by 2030. A compound annual growth rate of 17.4% is expected of Brazil battery market from 2024 to 2030. The Brazil battery market generated a revenue of USD 1,974.8 million in 2023 and is expected to reach.

Brazil Sodium-ion Battery Market is gaining traction as an emerging alternative to lithium-ion batteries, offering benefits of cost-effectiveness, abundant raw materials, and improved safety profiles. Ongoing innovations in cathode and anode materials are enhancing the energy density and cycle life.

Sodium is 1,180× more abundant than lithium in Earth's crust and costs just \$0.05/kg vs. \$15/kg for lithium . This translates to 20-30% lower cell production costs compared to LFP lithium batteries . For Brazil, where currency volatility impacts imports, locally sourced sodium enables predictable.

Solar energy storage in Brazil is expected to attract R\$45 billion (\$7.8 billion) in investments through 2030, according to a study by New Charge. Of this total, R\$14 billion would go to off-grid applications, R\$16 billion to utility-scale

systems and R\$15 billion to commercial and industrial (C&I).

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include 300MW energy capacity purchase that could drive an estimated \$450m in investments from winning bidders.
