

Solar 11 in 1 battery charger

Overview

Designed to charge NiMH and NiCad rechargeable batteries in AAA, AA, C, D, and 7 GUM sizes, this compact, solar-powered charger is perfect for outdoor enthusiasts, travelers, and those looking to reduce their carbon footprint. Can a solar battery charger charge a battery?

Let the sun charge your batteries! This solar charger holds two Rechargeable Batteries of the same type and size (D, C, AA, AAA and Prismatic). It puts out about 150mA and about 5 volts. Many other solar battery chargers tested were unsuitable because their voltage was too low.

How many prismatic batteries can a solar charger charge?

The solar charger will also charge 7 different sizes of Prismatic rechargeable batteries. Prismatic batteries are a fairly new battery used for some mobile devices. The Universal Solar Battery Charger is small which makes it convenient for home, extended power outages and outdoor activities.

Why is my solar battery charger not working?

Many other solar battery chargers tested were unsuitable because their voltage was too low. There is a built-in stand on the bottom of the charger, which can be adjusted so that the charger points directly towards the sun.
