How many watts is a 12V battery?

Anything under 5-10 watts is not enough, as these will only "trickle charge" your battery very slowly. In general, 12v panels are only available up to a rating of around 200-watts; from there up they are usually 24v or 48v. There

are various sizes of 12v batteries available, 100ah being the most common.

Which battery is best for solar?

Lithium-ion batteries are arguably the best batteries for solar. They are maintenance-free, more efficient, have a far deeper discharge capability, and don't need ventilation, making them the ideal choice. These batteries are extremely expensive and out of the price range for most small solar setups.
