

# Solar battery converter

## Overview

---

What is the difference between a solar inverter and a battery?

Solar panels produce DC power, and batteries store DC energy, but households and most appliances run on AC power, which is also supplied by the electricity grid. Inverter converts DC power to AC power, but not all inverters are the same; solar inverters and battery inverters have very different purposes, which we explain in more detail below.

How do solar inverters work?

Solar inverters convert solar DC power to AC power. These simple grid-connected (grid-tie) inverters use one or more strings of solar panels and are the most common type of inverter used around the world.

How much does a solar inverter cost?

Depending on the output power rating, inverter can cost anywhere from \$1500 for a 2.5kW model to \$8000 for a 10kW model. See our best off-grid solar system review for more information. Solar charge controllers, also known as solar regulators, are not inverters but solar battery chargers connected between the solar panel/s and battery.

What is a battery inverter?

Battery inverters convert DC low voltage battery power to AC power. These are available in a huge range of sizes, from simple 150W plug-in style inverters used in vehicles, to powerful 10,000W+ inverters used for off-grid power systems. Simple 'plug-in' style battery inverters are often used in caravans, RV's, boats and small off-grid homes.

What is a solar inverter?

First, let's clarify what an inverter is. Solar panels produce DC power, and batteries store DC energy, but households and most appliances run on AC power, which is also supplied by the electricity grid.

What are the different types of solar inverters?

Solar Inverter – Grid-tie solar inverters are used for feeding energy into your home or the grid. As explained below, these can be string solar inverters or microinverters. Battery Inverter – Basic inverters used with batteries. These are often used in RVs and caravans. Hybrid Inverter – Combined solar & battery inverter.
