

Solar battery for home cost

Overview

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does a solar battery storage system cost?

The cost of a solar battery storage system for your home can range from as low as \$300 to more than \$20,000, depending on the size of your home, quality of the storage system, and energy consumption. Most systems typically cost around \$10,000 on average.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

How much does a solar battery backup cost?

To ensure power for larger appliances or longer periods, you'll need to invest in multiple batteries. The cost of installing a solar battery backup system is anywhere from \$300 to \$15,000, with an average cost of \$6,000 for an entire home installation.

How much does a Tesla Solar battery cost?

Tesla's solar batteries use lithium-ion batteries, which cost around \$9,000 to \$30,000 with installation. Lithium-ion batteries are long-lasting, durable, and require little maintenance.

Solar battery for home cost

[Solar Battery Cost: Is It Worth It in 2025? , Angi](#)
