

Solar battery solutions 1 2 v

Overview

What AA batteries are used for solar landscape lighting?

These AA, 1.2-Volt batteries are designed for solar landscape lighting and are charged by the light's solar panel with no other equipment necessary. These batteries are intended for use only with solar landscape lighting products. How can we improve our product information?

.

Do solar lights come with batteries?

We also carry the 3.2V solar light batteries for Gama Sonic lamp posts and Atlantic Solar post cap lights. All solar lights that light up at night do include batteries that store the energy from the sun during the day.

Can you replace a battery with a solar light?

The voltage must be exact when you replace your batteries for solar lights. If the existing battery is a 1.2V, you must replace it with a 1.2V battery. If the existing battery is a 3.2V, you must replace it with a 3.2V battery. Voltage is not interchangeable, since the circuitry is different.
