1cm 25mAh

AS-LiB® is a rechargeable battery that has no liquid electrolyte and is entirely solid. Its configuration is similar to that of a lithium-ion battery, and charging and discharging is achieved by moving lithium ions between the anode and cathode electrodes.

AS-LiB® is a rechargeable battery that has no liquid electrolyte and is entirely solid. Its configuration is similar to that of a lithium-ion battery, and charging and discharging is achieved by moving lithium ions between the anode and cathode electrodes.

**what does solid state battery mean?**

A solid-state battery is a type of battery that uses a solid electrolyte instead of the liquid or gel electrolyte found in traditional batteries, such as lithium-ion batteries.
