

Standalone energy storage project financing options in Singapore 2026

Overview

Does project finance apply to energy storage projects?

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project.

What is energy storage systems for Singapore?

Energy Storage Systems for Singapore^{3.1} ESS has unique characteristics as it can act as both a load and a generator, allowing it to time-shift energy by charging and storing energy, and discharging the energy later when required. Depending on the technology and characteristics, ESS can provide short or sustained response. The mai.

Why is Singapore a good place to invest in renewables?

Finally, Singapore has built up a vibrant ecosystem of companies across the value chain ranging from clean energy solution providers, project and legal advisories and financiers that can support the development and execution of renewables projects in the region.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.

Are solar and wind projects a good investment?

These projects will have long-term predictable revenue streams. In addition, lenders may be willing to finance merchant cashflows, but with less leverage

and subject to detailed market studies and cash sweeps. These trends for solar and wind projects also apply to energy storage projects.

Can Singapore be a green financing hub?

We encourage companies to leverage Singapore's strengths as a green financing hub to tap on the wide range of world-class financial institutions here, such as UOB and Clifford Capital to support investments into renewables.
