

# **Successful bid price of backup power battery project in Australia 2030**

## Overview

---

A large battery project in South Australia sells for nearly \$500 million as investment in renewable energy surges.

A large battery project in South Australia sells for nearly \$500 million as investment in renewable energy surges.

Six new big battery projects – two in Victoria and four in South Australia – have been named as the winners of the federal government’s first test of its Capacity Investment Scheme, its flagship policy to propel the country towards its 2030 renewable energy target. The projects, which include one.

RWE Renewables Europe & Australia, a leading player in renewables globally, has been successful in the New South Wales competitive tender process offering Long-Term Energy Service Agreements to project developers of long duration storage projects. RWE’s Limondale battery energy storage system with.

This was the second-highest quarterly investment ever, just behind the AUD 2.8 billion seen at the end of 2023. The Clean Energy Council’s Quarterly (Q1 2025) Investment report shows that six major projects got funding this year. They added 1.5 GW of storage and 5 gigawatt-hours (GWh) of energy.

A new report, Charging Ahead – Australia’s Battery Powered Future reveals the battery industry could provide \$16.9 billion per annum in value-add and support 61,400 local jobs by 2030. Increased adoption of electric vehicles is the key driver behind the forecast growth, with increased need for.

Investments in battery storage within Australia's National Electricity Market (NEM) are increasingly profitable due to higher power price volatility and changing market dynamics, according to the latest report by Wood Mackenzie. Australia is a leader in renewables deployment, but battery storage.

The National Electricity Market (NEM) is projected to need 19 gigawatts/55 gigawatt-hours of dispatchable BESS storage by 2030, but on track to commission 21 gigawatts/45 gigawatt hours, leaving a shortfall of about 10

gigawatt-hours in storage capacity. Recent critical mineral oversupply and. Are battery storage Investments a good investment in Australia?

An analysis of battery storage investments in Australia published by Wood Mackenzie late last year indicated a positive outlook for battery storage profitability, driven by higher power price volatility and changing market dynamics.

Where can I find information about big battery projects in Australia?

For more information about big battery projects see Renew Economy's Big Battery Storage Map of Australia. Giles Parkinson is founder and editor-in-chief of Renew Economy, and founder and editor of its EV-focused sister site The Driven. He is the co-host of the weekly Energy Insiders Podcast.

Why are energy companies investing in battery infrastructure?

Like governments, energy companies are also investing in battery infrastructure, to help strengthen Australia's energy grid. Earlier this year, Synergy began construction on Australia's second-largest battery project to date, the 500MW Collie Battery Energy Storage System (CBESS) in Western Australia [ii].

How many community batteries will Australia support?

In June, Energy Minister Chris Bowen announced the Australian Renewable Energy Agency (ARENA) would support up to 370 community batteries as part of Round 1 of its Community Batteries Fund, bringing the total amount of community batteries supported by the federal government to more than 420 across Australia [i].

Are battery projects a risky investment?

In the past, revenue uncertainty has been a key constraint for financing battery projects, which were considered high risk. The report shows a growing market for batteries in the NEM, with a massive pipeline of 60 GW of projects under development representing over AU\$80 billion (US\$50 billion) of potential investment.

Should home batteries be subsidized?

Some states have begun offering incentives for home batteries systems like providing rebates for the up-front installation costs and for connecting a

household or business to a VPP [viii], but for installations to significantly grow, these incentives will also need to increase.

## Successful bid price of backup power battery project in Australia 20

---

### [Saudi Arabia launches tender for 8 GWh of battery ...](#)

The Saudi Power Procurement Company (SPPC) has begun qualifying bidders for an enormous undertaking of four grid-scale battery projects totaling 8 GWh of storage capacity across the Kingdom. The projects mark the ...

### **Australia's clean energy transformation boosted by 19 projects**

The Minister for Climate Change and Energy has announced 19 renewable energy projects that will add 6.4 gigawatts (GW) of clean energy to the National Electricity ...

### **Introduction , National Battery Strategy , Department ...**

How we created the strategyAddressing climate change is the defining challenge of our time. The government is transitioning Australia's electricity grid to 82% renewable energy by 2030. This will support Australia's commitment to reduce ...
