

Successful bid price of floor standing battery project in Tunisia 2030

Overview

The project has a fixed TD0.112/kWh (US\$0.036/kWh) tariff with the national grid operator, which it secured in December as one of the winning bids in Tunisia's renewables tender programme that has been running since 2019.

The project has a fixed TD0.112/kWh (US\$0.036/kWh) tariff with the national grid operator, which it secured in December as one of the winning bids in Tunisia's renewables tender programme that has been running since 2019.

lables dans le mix énergétique à l'horizon 2030. La nouvelle stratégie énergétique à l'horizon 2035, adoptée en Avril 2023, a fixé un nouvel objectif d'installer une capacité d'énergies renouvelables de 8530 MW d'ici 2035 pour la production d'électricité. Par ailleurs, la stratégie vise également à.

In 2024, the energy dependency rate stood at 59%. Natural gas currently accounts for 94.5% of electricity production. In 2023, the production cost of a kWh of electricity was 472 millimes (0.145€), compared with a selling price set at 288 millimes (0.09€). This pricing gap makes energy subsidies a.

The World Bank has launched a call for interested consultants to conduct a technical study for a 350 MW to 400 MW solar and battery storage project in Tunisia. The selected consultant will provide recommendations on the optimal configuration of the solar plant, suggesting the solar as well as.

The Scatec/Aeolus Tunisian renewables joint venture has signed a 25-year power-purchase agreement with grid operator STEG for 100MW of the €87m 120MW Sidi Bouzid II scheme. Scatec will be EPC contractor. Qair has won two solar schemes totalling 300MW from last summer's 500MW tender with Voltalia.

Objectives: The aim of the technical study is to support the Tunisian government in its energy transition towards renewable sources by assessing the best configurations and functionalities of a Battery Energy Storage System (BESS) coupled with a 350-400 MWp solar park. This project intends to.
