

Successful bid price of home battery pack project in Ireland 2026

Overview

The project secured an agreement at a clearing price of £150,000/MW. The project is targeting a final investment decision in 2025 for delivery by the end of 2026. These provisional results are subject to approval by the Regulatory Authorities and are expected to be confirmed this.

The project secured an agreement at a clearing price of £150,000/MW. The project is targeting a final investment decision in 2025 for delivery by the end of 2026. These provisional results are subject to approval by the Regulatory Authorities and are expected to be confirmed this.

The provisional results of the Ireland T-4 2028/29 auction were published on Friday 20 December with a total of 5,942MW of capacity agreements awarded to auction participants at a clearing price of €149,960/MW. In total, SSE has secured contracts for 547MW of de-rated electricity generation.

In 2023, the global average battery price per kilowatt-hour of storage capacity decreased 14%, returning to a long-term trend of declining prices. That trend is expected to continue. In 2026/27, the average pack price is expected to fall below \$100/kWh, based on raw material costs, competition, and.

Here's a quick overview of typical home battery system prices in Ireland for 2025, including SEAI grant deductions. These figures are based on real quotes from Irish installers and reflect common system sizes used in homes across the country. Your actual cost may vary depending on installation.

The renewables business also secured a 10-year capacity agreement for the proposed 100MW / 200MWh Derrymeen battery storage project in County Tyrone (14MW). The project secured an agreement at a clearing price of £150,000/MW. The project is targeting a final investment decision in 2025 for delivery.

It is a competitive auction-based design where the most efficient and lowest cost capacity is most likely to be successful. This design helps to promote the short-term and long term interests of consumers of electricity across Ireland and Northern Ireland with respect to price, quality, reliability.

This auction, known as a T-4 auction because it secures capacity four years in advance, ran on 23 March, procuring sufficient capacity to meet security of supply for the period 1 October 2026 to 30 September 30 2027. This auction secured a total of 7,204 megawatts (MW) of capacity, of which 1,519.
