

Successful bid price of hybrid renewable storage project in Poland 2026

Overview

Why did Poland win a 17-year energy storage contract?

In mid-December last year, the project won a 17-year secured capacity contract at the auctions held by Poland's transmission grid operator. Energy storage facilities will ensure the flexibility and reliability of the grid, supporting the integration of renewable energy generation in the Polish energy mix, Chilinska-Zawadzka added.

When will greenvolt & BYD energy storage projects start?

Deliveries for both projects will begin in Q4 2025, with completion scheduled for Q1 2026. Through its collaboration with BYD Energy Storage, Greenvolt Group is successfully expanding its energy storage projects in Europe while strengthening the Polish renewable energy market.

When will BYD energy storage start delivering energy storage projects?

Both projects have secured capacity market contracts and are scheduled to begin deliveries in 2028. The agreement with BYD Energy Storage strengthens our commitment to developing and executing energy storage projects, which are essential for maximizing the integration of renewable energy.
