

Successful bid price of hybrid solar storage project in Saudi Arabia 2026

Overview

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China.

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China.

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China. Energy storage costs have been on the sort of slide.

At present, SPPC sets the bid submission date as 02 June 2025. Each project will be developed under a build-own-operate (BOO) model, with the successful bidder holding 100 per cent equity in the special purpose vehicle (SPV) set up to develop and operate the Independent Storage Provider (ISP).

The Saudi Battery Storage Market is projected to reach \$1.693 billion in revenue by 2030, growing at a 35.9% CAGR from 2024 to 2030. This rapid expansion is driven by the country's recent achievement of securing a position among the top ten global energy storage markets, fueled by large-scale.

Saudi Arabia has emerged as one of the world's top 10 markets for battery energy storage, coinciding with the launch of the 2,000-megawatt-hour Bisha project, one of the largest energy storage initiatives in the Middle East and Africa. The Kingdom, through its National Renewable Energy Program led.

Saudi Arabia's solar energy storage market is experiencing rapid expansion, with its value reaching USD 160.43 million in 2024 and projected to climb to USD 728.01 million by 2033, according to the IMARC Group. This robust growth, marked by a forecasted annual rate of 17.10% from 2025 to 2033, is.

The Kingdom plans to operate 8 GWh of energy storage projects by 2025, expanding this to 22 GWh by 2026, which would place it as the third-largest global market for energy storage, following China and the United States. The Bisha battery energy storage project, recently brought online, comprises.
