

# **Successful bid price of solar diesel hybrid storage project in India 2026**

## Overview

---

New Delhi: In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of ₹3.32 per unit—5.8 per cent lower than the rate discovered in a similar tender by SECI in December 2024, according to a report by JMK.

New Delhi: In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of ₹3.32 per unit—5.8 per cent lower than the rate discovered in a similar tender by SECI in December 2024, according to a report by JMK.

ation. Recent energy storage auctions in India reveal record-low prices, with unsubsidized standalone battery storage bids at 2.8 lacs/MW/month and solar+storage bids at 3.1–3.5 l R/kWh. Our analysis, based on implied solar and storage costs from these bids and bottom-up global cost estimates.

Solar Energy Corporation of India (SECI) has revealed the results of a reverse auction for solar PV paired with battery storage that will connect to the Inter State Transmission System (ISTS). The state-run company announced four winning bids at ₹3.52/kWh (US\$0.041) and one at ₹3.53 at the end of.

In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of ₹3.32 per unit—5.8 per cent lower than the rate discovered in a similar tender by SECI in December 2024, according to a report by JMK Research. New Delhi: In a.

ICRA, an Indian credit rating agency, said India's renewable energy capacity could rise to 250 GW by March 2026, up from 201 GW in September 2024. This growth will be driven by an 80 GW project pipeline, following improved tendering in 2024. Solar capacity will reach 132 GW by March 2026, with 91.

In July 2024, SECI's 1200MWh BESS project attracted winning bids at Rs 3.41 per unit. Interestingly, JSW Neo Energy, which won an allocation at Rs 3.42, had won a bid in 2022 at Rs 10.84 per unit effectively. JSW was in fact lucky that its bid was approved, for multiple subsequent tenders that.

State-owned firm Solar Energy Corporation of India (SECI) has launched a solar-plus-storage tender seeking 1.2GW of solar PV. SECI issued a request for selection (RfS) last week (19 June) for the competitive solicitation process and aims to hybridise the solar PV generation with 600MW/3.6GWh of. What is SECI's solar-plus-storage tender?

SECI issued a request for selection last week seeking 1.2GW of solar PV and 600MW/3.6GWh of BESS. Credit: Solar Energy Corporation of India. State-owned firm Solar Energy Corporation of India (SECI) has launched a solar-plus-storage tender seeking 1.2GW of solar PV.

What's going on with wind-solar hybrid prices?

The latest price matches the tariffs seen in recent wind-solar hybrid (WSH) auctions and falls well below those in standalone wind bids, JMK Research said. The report highlighted the growing shift toward integrating energy storage with solar generation.

How much does solar cost in India?

ble 1. These bids include not only storage costs but solar costs as well; the solar Levelized Cost of Electricity (LCOE) is likely around 2.3-2.5 INR/kWh, reflecting the latest solar costs in India, comprising the majority of the winnin.

Should energy storage be integrated with solar generation?

The report highlighted the growing shift toward integrating energy storage with solar generation. A February 2025 notification by the Ministry of Power mandates that all upcoming solar tenders include co-located ESS of at least two hours' duration, equivalent to 10 per cent of the project's installed capacity.

How much did SECI's Bess project cost in 2022?

Consider the numbers. In July 2024, SECI's 1200MWh BESS project attracted winning bids at Rs 3.41 per unit. Interestingly, JSW Neo Energy, which won an allocation at Rs 3.42, had won a bid in 2022 at Rs 10.84 per unit effectively.

Why did sjvn find a solar tariff?

The tariff was discovered in a reverse auction conducted by SJVN Ltd for setting up 1200 MW of solar capacity co-located with 600 MW/2400 MWh of energy storage, offering four hours of backup. The latest price matches the

tariffs seen in recent wind-solar hybrid (WSH) auctions and falls well below those in standalone wind bids, JMK Research said.
