

Successful bid price of solar storage container project in Vietnam 2025

Overview

According to the Ministry of Industry and Trade, the 2025 solar pricing with storage can reach up to 1,875 VND/kWh, higher than traditional solar. This unveils new ****Sustainable energy incentives**** with the stability and versatility of renewable sources.

According to the Ministry of Industry and Trade, the 2025 solar pricing with storage can reach up to 1,875 VND/kWh, higher than traditional solar. This unveils new ****Sustainable energy incentives**** with the stability and versatility of renewable sources.

On April 10, 2025, the Ministry of Industry and Trade (MOIT) issued Decision 988/QĐ-BCT (“Decision”), updating Vietnam’s feed-in tariff (FiT) rates for solar power projects. These tariffs, effective under the framework of Circular 09/2025/TT-BCT issued on February 1, 2025 (“Circular”), will apply.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region. For solar power plants relying on battery storage systems, the FiTs for the three regions will.

Vietnam’s Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

The 2025 solar pricing framework under Decision 988/QĐ-BCT of the Ministry of Industry and Trade is categorized by plant type and geographic region. Prices exclude VAT and reflect variance in solar potential and operational costs across regions. Higher prices incentivize solar developments with.

HÀ NỘI — The Ministry of Industry and Trade (MOIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power plants, including hydropower, gas turbines using natural gas and solar power. The decisions came into effect on April 10, 2025, in line with.

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS). This policy move, effective throughout 2025, was formalized through Decision. What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

What are the new fits for solar power projects?

These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy transition strategy. The most significant development in this update is the introduction of differentiated tariffs for solar power projects that incorporate battery storage.

Are solar plants equipped with Bess eligible for higher rates?

For the first time, solar plants equipped with BESS will be eligible for higher rates to compensate for the added complexity and investment costs. Tariff levels are also region-specific, taking into account solar radiation potential in Northern, Central, and Southern Vietnam.
