

Swatch solar battery

Overview

Do solar-powered watches need batteries?

A solar-powered watch needs to have a battery to store the electrical energy that has been converted from light by the solar cells. This battery can be either a rechargeable or non-rechargeable battery such as a lithium-ion, nickel metal hydride, or alkaline. Some manufacturers, like Citizen, claim their solar watches don't use batteries.

How do solar watch batteries work?

The battery of solar-powered watches is charged through solar light exposure. The main difference between quartz watch batteries and solar watch batteries is in the source of their energy. but there are a few others: Generally, a standard quartz watch battery will run for two to three years before needing replacement.
