

Taiji industrial energy storage

Overview

Guangdong Taiji Power Co., Ltd. is a manufacturer focus on hydrogen production and storage systems based on PEM &AEM membrane electrode assembly (MEA). We offer complete solutions for the production and storage of hydrogen.

Guangdong Taiji Power Co., Ltd. is a manufacturer focus on hydrogen production and storage systems based on PEM &AEM membrane electrode assembly (MEA). We offer complete solutions for the production and storage of hydrogen.

Guangdong Taiji Group Co., Ltd., established in 2018, is dedicated to the localization and industrialization of hydrogen core components and materials. Taiji has developed and mass-produces its own core materials, including catalysts for fuel cells and electrolyzers, as well as anion exchange.

Guangdong Taiji Power Co., Ltd. is a manufacturer focus on hydrogen production and storage systems based on PEM &AEM membrane electrode assembly (MEA). We offer complete solutions for the production and storage of hydrogen. Awarded with IATF16949, ISO14001, and ISO 45001 certifications, and 47.

Taijiang energy storage projects constitute innovative solutions designed to enhance energy efficiency and reliability within the renewable energy landscape, 2. These initiatives aim to integrate renewable sources with energy storage systems capable of balancing supply and demand, 3. Taijiang's.

Hydrogen energy storage system is an integrated energy storage and power generation equipment, mainly including hydrogen generation system, hydrogen storage system, hydrogen electricity generation system, electric energy inverter system and electrical control system, etc. It converts other excess.

Taiji's PEMFC System Qingtian series fuel cell system is equipped with Taiji's S36 series stack (S36-90), which is a water-cooled system designed for forklift engine needs of 48V and 80V voltage platforms in the market, and can be

loaded on 2.5T, 3T, 3.5T and other models of forklifts. In addition.

There are high pressure models and low pressure models, the high pressure model is equipped with 35MPa hydrogen storage tank, the low pressure model is equipped with self-developed 3MPa hydrogen storage alloy tank. If required, hydrogen supply systems can be configure. Considering the cost of the.
