

# Taiwan energy storage demonstration project

## Overview

---

Jointly developed with Shinshin Credit Corporation, this milestone project significantly enhances grid stability and reliability, reinforcing Taiwan's transition to a more resilient energy infrastructure. The facility officially commenced commercial operations in March. What are Taiwan's energy storage development trends?

In 2020, Taiwan showed sign of energy storage development trends, with Taipower launching a procurement for energy storage AFC service under bilateral contracts, followed by tenders for projects located in Tainan, New Taipei City, and Kaohsiung.

How many MW of battery-based energy storage will Taiwan have by 2025?

Taiwan aims to accumulate a total of 590 MW of battery-based energy storage by 2025, with a target of 160 MW managed and procured by state-owned Taiwan Power Company (TPC), and 430MW to be developed via private-sector, independently operated storage facilities.

What is Taiwan's energy storage industry?

According to the analysis put forward by the Industry, Science and Technology International Strategy Center (ISTI) of the ITRI, Taiwan's energy storage industry can be divided into batteries, power regulators, power management systems, and system integration (SI), as well as other sectors.

What is energy storage equipment in Taiwan?

Taiwan revised its “Renewable Energy Development Act” on May 1, 2019, and Article 3, paragraph 1, Subparagraph 14 of the Act clearly defines energy storage equipment as a means of storage for power which also stabilizes the power system, including the energy storage components, the power conversion, and power management system.

Does Taiwan have a demand for energy storage systems?

Taiwan has a demand for energy storage systems, electric vehicles, and industrial development. Taiwan's foundation in the energy storage industry is in the field of battery technology, but it is difficult to compete with international manufacturers in terms of costs.

Will Taiwan's energy storage system play a role in grid stability?

TECO Chairman Sophia Chiu pointed out that in the future when a large amount of offshore wind power is added to Taiwan's power system, energy storage systems will play an important role in grid stability.
