Opened in late 2024, this lithium-ion wonder stores surplus wind energy from the Adjara Highlands and solar power from the Kakheti plains. Think of it as a giant power bank for the nation, but instead of charging phones, it’s juicing up entire neighborhoods during blackouts. Why Should You Care?

.

Introduction A typical modern Battery Energy Storage System (BESS) is comprised of lithium-ion battery modules, bi-directional power converters, step-up transformers, and associated switchgear and circuit breakers. BESS are controlled and monitored by Install landfill gas to power facility. Thanks.

Nestled between Europe and Asia, Georgia’s capital is quietly becoming a magnet for renewable energy investments—and 2025 might just be its breakout year. With global giants like Tesla scaling up Megapack production in Shanghai [4] [9] and Indonesia launching \$45 billion energy projects [5].
