

The domestic energy storage space exceeds 100 billion

Overview

It's against this backdrop that the American Clean Power Association made a stunning announcement today: U.S. energy storage manufacturers and developers are committing \$100 billion over the next five years to establish a fully domestic battery supply chain, a move that could.

It's against this backdrop that the American Clean Power Association made a stunning announcement today: U.S. energy storage manufacturers and developers are committing \$100 billion over the next five years to establish a fully domestic battery supply chain, a move that could.

WASHINGTON, D.C., April 29, 2025 – Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 billion into building and buying American-made grid batteries. This investment is expected to fuel the creation of.

The pledge represents a more than fivefold jump in “active investments” and could enable 100% U.S.-made supply for domestic battery storage projects, the American Clean Power Association said. Plus Power’s 250-MW Sierra Estrella battery storage project in Avondale, Arizona. The U.S. energy storage.

Energy storage is a crucial grid-strengthening resource that can provide peaking capacity, lower energy bills, power during extreme weather events and stable power during grid outages. The U.S. energy storage industry has made a historic commitment to invest \$100 billion into building and buying domestically produced grid batteries. Announced today by American Clean Power Association (ACP), this investment is expected to fuel the creation of 350,000 jobs across the battery energy.

The energy storage industry has announced a historic commitment to invest \$100 billion in building and buying American-made grid batteries, including capital for new battery manufacturing facilities and procurement of American-made batteries. This investment represents a clear pathway to supplying.

It's against this backdrop that the American Clean Power Association made a stunning announcement today: U.S. energy storage manufacturers and developers are committing \$100 billion over the next five years to establish a fully domestic battery supply chain, a move that could fundamentally reshape. Will US energy storage industry invest \$100 billion in grid batteries?

"The U.S. energy storage industry is committing over \$100 billion of investment in the next five years to build and to buy American-made grid batteries," declared Jason Grumet, CEO of ACP, during the announcement.

What does ACP's \$100 billion commitment to domestic energy storage look like?

The industry's \$100 billion commitment to support domestic energy storage production "demonstrate [s] what success can look like," ACP CEO Jason Grumet said in the briefing. Right now, he added, many industry players are in a holding pattern until more clarity develops around tax and trade policy.

Why is the energy storage industry important?

"The energy storage industry is providing essential power when needed most while boosting domestic manufacturing and creating jobs across the country," said Jason Grumet, CEO of ACP.

How is the energy storage industry preparing for a grid-scale energy storage supply chain?

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply chain, building or expanding more than 25 manufacturing facilities for grid-scale energy storage. With today's investment commitment, the industry has announced plans to rapidly expand ongoing efforts.

Will American-made batteries meet 100% of domestic energy storage demand?

It aims to enable American-made batteries to meet 100% of domestic energy storage project demand—a dramatic shift from the current landscape where most batteries used in the United States are imported, primarily from China. This ambitious initiative comes at a critical juncture.

Will a fully domestic battery supply chain reshape America's energy landscape?

It's against this backdrop that the American Clean Power Association made a stunning announcement today: U.S. energy storage manufacturers and developers are committing \$100 billion over the next five years to establish a fully domestic battery supply chain, a move that could fundamentally reshape America's energy landscape and manufacturing base.
