

The impact of energy storage policies in europe and the united states

Overview

How do countries adopt energy storage technologies?

Across Europe, countries have implemented a patchwork of policies and mandates to drive the adoption of energy storage technologies. For example, the EU's Energy Storage Directive sets targets for member states to deploy a minimum amount of energy storage capacity by 2030.

How does ESS policy affect transport storage?

The International Energy Agency (IEA) estimates that in the first quarter of 2020, 30% of the global electricity supply was provided by renewable energy. ESS policy has made a positive impact on transport storage by providing alternatives to fossil fuels such as battery, super-capacitor and fuel cells.

How do ESS policies promote energy storage?

ESS policies mostly promote energy storage by providing incentives, soft loans, targets and a level playing field. Nevertheless, a relatively small number of countries around the world have implemented the ESS policies.

What are energy storage policies?

These policies are mostly concentrated around battery storage system, which is considered to be the fastest growing energy storage technology due to its efficiency, flexibility and rapidly decreasing cost. ESS policies are primarily found in regions with highly developed economies, that have advanced knowledge and expertise in the sector.

How many states have energy storage policies?

Around 15 states have adopted some form of energy storage policy, including procurement targets, regulatory adaptation, demonstration programs, financial incentives, and/or consumer protections. Several states have also required that utility resource plans include energy storage.

How can energy storage be financed in Europe?

Effective financing mechanisms are essential to scaling up energy storage deployment across Europe. Measures like investment tax credits, depreciation allowances, and feed-in tariffs can help reduce the upfront costs of energy storage projects and attract greater private investment.
