

Tissot t-touch connect solar battery life

Overview

Hidden on the watch dial, the latest-generation photovoltaic cells provide a battery life of up to 6 months by capturing energy from both natural and artificial light.

Hidden on the watch dial, the latest-generation photovoltaic cells provide a battery life of up to 6 months by capturing energy from both natural and artificial light.

Towards the end of 2020 Tissot officially announced the T-Touch Connect Solar, the brand's first attempt at a connected smartwatch, with a focus on long battery life, smart functions, and privacy. And, while this new watch can connect to your smartphone and display notifications on your wrist.

The hybrid design tells the time while also connecting to a paired smartphone to deliver fitness tracking, smart notifications, and an in-house solar powered movement with a battery life of 6 months. The Tissot T-Touch Connect Solar is the first connected watch or Bluetooth watch by Tissot, or any.

Does anyone know how long the battery life lasts with pretty much all functions turned off besides notifications/vibration?

I was curious if the solar was enough to charge the watch indoors/outdoors indefinitely with just these basic functions. It has outstanding battery life. I have had mine for a.

Catering to adventure enthusiasts, work professionals, and the fashion-conscious alike, it offers lasting durability, functionality, and eco-friendly solar recharge capability. But is it good after months, or even years, of use?

This long-term user review reveals a bit more about how this watch.

As a reference, my old T-touch lasted about 15 years. Then the movement was end of life by Tissot and it died as there are no replacement spares. Tissot would not service it anymore Can't speak for Tissot but if you keep the watch well charged the battery should be good for 15+ years. 20+ years.

Thanks to solar charging, your Tissot connected watch can run for months without needing to be plugged in. Integrated solar cells beneath the dial capture light to extend battery life for unmatched endurance in a sleek design. Monitor how solar charging and feature usage affect your battery life. What is Tissot t-touch connect solar?

The Tissot T-Touch Connect Solar is the first connected watch or Bluetooth watch by Tissot, or any Swatch Group brand for that matter, and broadly hints at where the world's largest Swiss watch conglomerate is heading.

Does Tissot have a connected smartwatch?

Find out more about how we test. Towards the end of 2020 Tissot officially announced the T-Touch Connect Solar, the brand's first attempt at a connected smartwatch, with a focus on long battery life, smart functions, and privacy.

What is a t-touch connect solar?

The T-Touch Connect Solar features a large 47mm titanium case with a scratch-resistant ceramic bezel. It feels exactly like a regular Tissot watch, which is to say incredibly solid and robust, not like a piece of fragile technology. The T-Touch Connect Solar is a Swiss-Made connected watch.

Is Tissot's 'connect solar' a wrist-worn mini-tablet?

And, while this new watch can connect to your smartphone and display notifications on your wrist, Tissot is at pains to make clear that the Connect Solar is first and foremost a watch, 'not a gadget, not a "device", and not a wrist-worn mini-tablet'.

What does a t-touch connect solar watch feel like?

It feels exactly like a regular Tissot watch, which is to say incredibly solid and robust, not like a piece of fragile technology. The T-Touch Connect Solar is a Swiss-Made connected watch. This certification is a guarantee of manufacturing quality and of security, as well as component origin.

What is a Tissot t-touch watch?

The T-Touch in the name signals this is another watch that benefits from Tissot's tactile watch design, which essentially means you can press one of a series of pressure sensitive areas placed around the screen to adjust settings

like Bluetooth connection with your phone, adjusting watch vibration and turning on airplane mode.
