

Total investment cost of LFP battery system project in Chile

Overview

China's Tsingshan Holding Group will invest \$233.2 million to set up a plant in Chile to produce lithium iron phosphate (LFP), used to power electric vehicles, Chilean President Gabriel Boric said on Monday.

China's Tsingshan Holding Group will invest \$233.2 million to set up a plant in Chile to produce lithium iron phosphate (LFP), used to power electric vehicles, Chilean President Gabriel Boric said on Monday.

China's Tsingshan Holding Group will invest \$233.2 million to set up a plant in Chile to produce lithium iron phosphate (LFP), used to power electric vehicles, Chilean President Gabriel Boric said on Monday. The plant in northern Chile is expected to be operational in May 2025 and will create 668.

A prolonged drop in lithium prices has forced BYD (HKG: 1211, OTCMKTS: BYDDY) to withdraw plans to invest in Chile, the world's second-largest lithium producer. BYD and Chinese metals group Tsingshan are backing out of multimillion-dollar plans to build lithium cathode plants in Chile, Reuters said.

China's Tsingshan is planning to invest \$233.2m (1.71bn yuan) to set up a lithium iron phosphate (LFP) production plant in Chile. Planned to be built in Chile's Antofagasta region, the proposed plant will have the capacity to produce 120,000 tonnes of LFP. Combine business intelligence and.

Chinese electric vehicle giant BYD and metals group Tsingshan have scrapped their plans to build lithium cathode plants in Chile, a move that could ripple through the electric vehicle (EV) battery supply chain, according to Chile's economic development agency Corfo. Announced on May 7, 2025, the.

BYD has scrapped plans to build a lithium iron phosphate (LFP) cathode factory in Chile due to a sharp drop in global lithium prices, affecting the project's profitability. Chile, the world's second-largest lithium producer, had been a site for multi-million-dollar ventures by BYD and Tsingshan.

Chinese automaker BYD is planning to invest \$290 million in building a battery material factory in Chile's Antofagasta region, according to the Chilean

economic development agency CORFO. The plant could produce up to 50,000 tonnes of LFP cathode material annually, and is expected to be commissioned. How much does a battery cost in Chile?

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh. Although projects such as Engie's BESS Coya are already enjoying these large spreads, this capacity payment will partially de-risk Chile's dependence on volatile, but still profitable, merchant revenues.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Is Boric negotiating a lithium deal in Chile?

It's currently negotiating state control over SQM, which has a lithium contract that expires in 2030. In 2019 three companies selected for value-added lithium projects in Chile dropped out of planned investments. Boric is on his first visit to China since being elected in 2021.

Why are project finance transactions increasing in Chile?

Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for renewable energy generators.

Will new solar assets in Chile have storage components?

New utility-scale renewable and PMGE assets in Chile (most of which are distributed solar plants smaller than 9 MW) will likely all have storage components moving forward.

How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could

increase the scope for bond financing.

Total investment cost of LFP battery system project in Chile

[China's Tsingshan plans \\$233m investment in Chilean ...](#)

China's Tsingshan is planning to invest \$233.2m (1.71bn yuan) to set up a lithium iron phosphate (LFP) production plant in Chile. Planned to be built in Chile's Antofagasta region, the proposed plant will have the capacity to ...

[LFP Battery Pack Pricing: Complete Guide to Cost-Effective ...](#)

Comprehensive overview of LFP battery pack pricing, including cost benefits, warranty coverage, and environmental advantages. Learn about scalable energy storage solutions and long-term ...

[BYD withdraws plans to build lithium plant in Chile as ...](#)

The project planned to produce 50,000 tons of LFP cathode material per year in Chile, using lithium carbonate as a raw material, with an estimated investment of at least \$290 million, according to a statement at the ...

[Unlocking the Full Potential of LFP Battery Solutions in Smart ...](#)

The strategic implementation of LFP battery technology in smart energy projects requires careful consideration of supplier capabilities,

system architecture, and long-term ...

China strengthens LFP investments in 2023 but structural surplus ...

China has continued to step up investments in the lithium-iron-phosphate (LFP) material sector this year, led on by the domestic electric vehicle sector's preference toward the LFP battery ...

The Economics of Battery Storage: Costs, Savings, ...

Calculating the ROI of battery storage systems requires a comprehensive understanding of initial costs, operational and maintenance costs, and revenue streams or savings over the system's lifespan.

BYD to supply BESS for 'world's largest energy storage project'

BYD recently overtook Tesla as the world's top-selling electric vehicle (EV) maker. Image: Production of BYD's Blade EV battery (credit: BYD). EV and BESS company ...

The Lithium Price Collapse: How BYD's Failed Investment in Chile

If lithium prices stabilize and rebound, BYD and competitors may reconsider investments in lithium-rich nations like Chile or Argentina. The near-term focus will likely shift to ...

[Battery Energy Storage System Production Cost](#)

Case Study on Battery Energy Storage System Production: A comprehensive financial model for the plant's setup, manufacturing, machinery and operations.

[Battery energy storage comes of age . Wood Mackenzie](#)

Through its low-cost LFP battery manufacturing and renewables coupling policies, China now accounts for around half of global installed storage capacity. It will broadly maintain market dominance with plans to commission ...

Battery Energy Storage System Production Cost , Case Study
