

Total investment cost of household energy storage project in Cyprus

Overview

The Mediterranean island country's Ministry of Energy, Commerce and Industry announced last week (14 November) that the government Council of Ministers had approved the €35 million (US\$36.89 million) scheme that day.

The Mediterranean island country's Ministry of Energy, Commerce and Industry announced last week (14 November) that the government Council of Ministers had approved the €35 million (US\$36.89 million) scheme that day.

The Ministry of Energy has today published guidelines for its €35 million energy storage scheme, previously approved by the Council of Ministers, aimed at promoting energy storage solutions across the country. The scheme, funded through the 'THALIA 2021-2027' Cohesion Policy Programme and the Just.

The government of Cyprus has confirmed financial support will be made available for renewable energy projects paired with energy storage. The Mediterranean island country's Ministry of Energy, Commerce and Industry announced last week (14 November) that the government Council of Ministers had.

NICOSIA - With a plethora of largely untapped wind and solar sources to generate power, Cyprus is turning toward offering incentives for alternate supplies, offering 35 million euros (\$36.99 million) aid for renewable energy projects tied to storage. That was announced by the Ministry of Energy.

For existing projects, grant amount is capped at 125 EUR per kW of power storage capacity. In the first funding round, applicants under feed-in-tariff (FiT) schemes can opt to stay under the old scheme or adopt a one-way contract of difference (CfD) approach under which they would need to adhere to.

Cyprus has introduced its first ever energy storage subsidy scheme concerning large-scale renewable energy plants, targeting a 350 MWh rollout. The scheme has a competitive character, offering EUR 35 million (\$36 million) for the purchase and installation of energy storage units alongside existing.

The Plan, with a total budget of €35 million, aims to reduce electricity costs for citizens, while enhancing the country's green energy transition. The Plan aims to support storage projects with a capacity of approximately 150MW, and a total storage capacity of approximately 350 MWh. The funding.
