

# Türkiye energy storage battery project

## Overview

---

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL).

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL).

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL 35 billion).

Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in Tekirdağ. This groundbreaking facility will be the first of its kind in Türkiye, boasting a GWh capacity. Moreover, it will be accompanied by the launch of a wind energy.

Since giving priority in 2022 to wind and solar power projects that include energy storage with a matching capacity, Turkey registered a wave of investment proposals. In reality, though, batteries are expensive and still in short supply, on top of increasing costs substantially and adding.

The world is racing to integrate clean energy at scale, and Türkiye is uniquely positioned to supply the backbone infrastructure. The recent partnership between Energy Vault and Astor Enerji on Battery Energy Storage Systems (BESS) is a significant development, offering flexibility, stability, and.

Subsequent legislative changes aim at promoting investments in energy storage projects, creating a framework for licensing and regulating energy storage systems, supporting companies in this sector, and identifying storage needs while determining the most suitable solutions for integration into the. Is Polat Energy Turkey's largest battery energy storage system?

Once commissioned, the facility will be Turkey's largest battery energy storage system. Polat Energy is an established renewables developer in Turkey, owning approximately 6% of the country's installed wind energy capacity with a cumulative power output of around 660 MW.

Will Türkiye's battery and storage power plants be approved next year?

However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year. Türkiye's battery imports remained steady at around \$1.1 billion, similar to last year.

Is Türkiye ready for a new battery industry in 2025?

Looking ahead to 2025, Usta predicted an influx of new companies, both domestic and foreign, joining the industry, a testament to Türkiye's potential for energy independence and global competitiveness. The association is set to host another battery summit in October next year.

Will Türkiye get a battery approval next year?

The first approvals are expected next year. Türkiye's battery imports remained steady at around \$1.1 billion, similar to last year. Usta forecasted that exports would rise from \$39 million to \$48 million by the end of the year.
