

Uk commercial energy storage system financing

Overview

What is Eccles battery energy storage system (BESS) project?

Mizuho EMEA is pleased to announce the successful financial close of the financing of Eccles Battery Energy Storage System (BESS) Project, a 400 MW / 800 MWh asset developed by KKR and Infracapital backed Zenobe Energy Ltd, an international provider of end-to-end solutions in fleet electrification and battery storage solutions.

What is Eccles funding?

The Eccles funding is the final phase of a GBP 750 million investment in Scotland by Zenobe. On March 3, 2025, the developer's Blackhillock BESS near Inverness was recently switched on at 200 MW/400 MWh capacity, and is expected to expand to 300 MW/600 MWh later in the year.

Will the Eccles battery save consumers £309 million?

Over the next 15 years, the Eccles battery is projected to save consumers £309 million by reducing the need to pay wind generators to switch off - known as curtailment costs - and prevent approximately 4.9 million tonnes of CO2 being emitted over 15 years.
