

# VRFB energy storage supplier quotation in Greece 2030

## Overview

---

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities .

Which companies are making VRFBs?

Tdafoq Energy Partners and Delectrik Systems signed a distribution and manufacturing agreement for VRFBs. Tdafoq will set up a VRFB manufacturing plant in Saudi Arabia, which will be scaled to a GWh capacity by 2025. Bushveld Minerals completed partial refurbishment of its Vanchem plant, which produces high purity pentoxide.

Who makes VRFBs in South Africa?

Local manufacturer Delectrik has delivered VRFBs locally and started to deliver for export, as well. Bushveld Energy achieved financial close and started construction on a minigrid featuring 3.5MW of solar PV and a 4MWh VRFB from CellCube. The minigrid is an IPP that sells energy to a mine. The VRFB used vanadium mined by Bushveld in South Africa.

Which energy storage projects have been approved by the Energy Regulatory Authority?

Image: Energy Regulatory Authority headquarters, credit: Energy Regulatory Authority. Swathes of energy storage projects including battery storage and pumped hydro have been approved by the regulator in Greece, as the country prepares for a big battery storage auction.

Why is the VRFB supply chain important?

Nearly every region of the world is seeing activities by VRFB companies and the supply chain. The number of activities along the supply chain is

increasing, which is important to allow for start up battery companies to deliver more and larger VRFBs. Plus, multiple established companies are entering the VRFB industry and its supply chain.

Will Greece provide financial support for 900MW energy storage capacity?

The government in Greece is looking to provide financial support for up to 900MW of energy storage capacity through a tender as previously reported by Energy-Storage.news. The country has an overall energy storage deployment goal of 3GW by 2030 to facilitate a 70% renewable energy target.
