

# **Warehouse solar storage cost vs benefit calculation in Cyprus**

## Overview

---

Why does Cyprus have a lack of solar energy?

**Lack of Storage:** Unlike other countries with hydroelectric dams or large battery storage facilities, Cyprus has nowhere to store excess solar energy during peak hours. **Grid Congestion:** In some areas, distribution lines can't handle the extra electricity being pushed into them, forcing operators to curtail solar production.

How much is Cyprus spending on energy transformation projects?

Here's a simplified estimate of what Cyprus is spending on its large-scale energy transformation projects, along with their expected delivery dates: Total cost: Conservatively €3.7 billion (could be more due to delays, contract disputes, and infrastructure challenges).

How does Cyprus reduce energy consumption?

**Reduced Energy Imports and Fines** – Cyprus currently spends hundreds of millions of euros importing fossil fuels and then paying up to €570 million in “emission” fines. Every kilowatt-hour stored in a home battery reduces reliance on expensive foreign energy sources, keeping that money circulating within the country.

What is happening with solar energy in Cyprus?

**Curtailment Issues & Grid Limitations** – Recent articles highlighting curtailment of excess solar energy due to grid instability. The magnitude of the curtailment problem in Cyprus - In 2024, 29% of green electricity was curtailed. This is equivalent of the total annual consumption of approximately 28,000 households.

How many PV systems are installed in Cypriot homes?

As of December 2023, approximately 10% of Cypriot households have installed PV systems on their rooftops. This translates to around 52,883

connected systems, primarily under net metering arrangements. Upgrading Existing PV Systems with Battery Storage
