

Wellington energy storage investment

Overview

AMPYR Australia has secured funding above A\$340m (\$221m) for its 300MW/600 megawatt hours (MWh) Wellington Stage 1 battery energy storage system (BESS) project in regional New South Wales (NSW), Australia.

AMPYR Australia has secured funding above A\$340m (\$221m) for its 300MW/600 megawatt hours (MWh) Wellington Stage 1 battery energy storage system (BESS) project in regional New South Wales (NSW), Australia.

AMPYR Australia has secured funding above A\$340m (\$221m) for its 300MW/600 megawatt hours (MWh) Wellington Stage 1 battery energy storage system (BESS) project in regional New South Wales (NSW), Australia. Scheduled to be operational by 2026, the project will boost the supply of dependable.

AMPYR develops, owns, and operates renewable energy generation and storage assets in south-east Asia, Europe and the USA. The Wellington BESS will be our first major battery investment in Australia. Our team for the Wellington Battery is based in Sydney and led by Anthony Yeates.

AMPYR Australia (AMPYR) today announced it has achieved financial close of its 300 MW / 600 MWh Wellington Stage 1 battery energy storage system (BESS) project in regional New South Wales (NSW). Once energised in 2026, the Wellington Stage 1 BESS will support the growing demand for reliable.

In a significant development within the realm of energy storage, Fluence Energy Inc. has been awarded the contract for the 300 MW / 600 MWh Wellington Battery Energy Storage System by AMPYR Australia. This project not only reinforces Fluence's prominent position in the burgeoning battery storage.

It will be one of the largest energy storage projects in the state, supporting renewable generation and contributing to improved reliability for the grid and consumers. The Elora BESS will establish Battery Energy Storage Systems (BESS) in Wellington County -powering thousands of local homes and.

If you're a facility manager scrolling through Google for energy storage ROI strategies, or a CFO wondering why Wellington C&I energy storage investment keeps popping up in board meetings – hi there! This piece is your backstage pass to understanding why industrial-scale battery systems are hotter. Who owns Wellington Battery energy storage system?

AMPYR Australia has acquired Shell Energy Australia's 50 per cent stake in the 300 MW / 600 MWh Wellington battery energy storage system (BESS) stage one project in New South Wales. AMPYR already owns Wellington BESS stage two (100 MW / 400 MWh), so now owns 100 per cent of the total 1,000 MWh project.

How long will it take to build the Wellington Battery?

Plans for construction of Stage 2 are ongoing, but construction is likely to follow 12 to 18 months behind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid. The output from both stages of the Wellington Battery represents the demand from over 60,000 homes.

How many GW of energy storage will Australia have by 2030?

It is worth noting that Ampyr Australia is targeting an operational portfolio of 3GW of energy storage in the country by 2030. Its Singapore-headquartered parent company, Ampyr Energy, is developing around 12GW of projects globally.

What will fluence energy do for the Wellington Stage 1 Bess project?

Fluence Energy will furnish and maintain the Wellington Stage 1 BESS project under a 20-year operational service contract using their advanced Gridstack technology and software solutions Mosaic and Nispera for revenue optimisation and asset performance management respectively.

What's going on with TransGrid & Wellington Bess?

The two companies launched a joint venture in 2022 to develop the 1GWh Wellington BESS, which will connect to an existing substation of high-voltage transmission system operator and manager Transgrid at Wellington and be adjacent to Central-West Orana Renewable Energy Zone (REZ).
