## Overview

---

Ever wondered how cities like Bridgetown can store excess energy without using lithium-ion batteries?

Enter compressed air energy storage (CAES)—the underdog of renewable energy solutions that's making waves in Barbados.

Ever wondered how cities like Bridgetown can store excess energy without using lithium-ion batteries?

Enter compressed air energy storage (CAES)—the underdog of renewable energy solutions that's making waves in Barbados.

The Willow Rock Energy Storage Center (WRESC) is proposed compressed air storage energy storage facility by Gem A-CAES LLC (Applicant), a wholly owned subsidiary of Hydrostor, Inc. .

With solar generation up 40% year-over-year but grid stability incidents doubling since 2023, the city needed a game-changer. Enter the Bridgetown Grid-Side Energy Storage Project: a 100MW/400MWh lithium-ion battery system strategically positioned at three key substations.

As industries worldwide seek reliable, cost-effective energy solutions, compressed air energy storage (CAES) systems like Bridgetown Air Energy Storage Equipment are emerging as game-changers.

Liquid air energy storage (LAES) uses air as both the storage medium and working fluid, and it falls into the broad category of thermo-mechanical energy storage
