This is the list of the largest public listed companies in the Energy sector from Japan by market capitalization with links to their reference stock and industry.

1. Mitsui & Co. Ltd 2. Inpex Corp 3. ENEOS Holdings, Inc. 4. Idemitsu Kosan Co.,Ltd. 5. Cosmo Energy Holdings Co. Ltd 6. MODEC, Inc. 7.

Idemitsu Kosan, Japan's biggest petroleum producer, has launched an energy storage business and announced its first lithium battery project. The company is in the joint venture (JV) Himeji Energy Storage Facility together with SMFL Mirau Partners, a subsidiary of Sumitomo Mitsui Finance and Leasing.

Lepton Energy offers a range of energy storage systems, complementing their high-quality solar modules that come with extensive warranties. With over a decade of experience in solar energy, the company provides tailored solutions for various solar systems. Egenera offers a robust cloud platform.

Explore oil and gas export opportunities and the regulatory environment in Japan. Japan is the largest LNG buyer in the world, importing approximately 77 million (77,327,079) tons in 2019, down 6.6 % (tons) from 2018. Its import dollar value in 2019 was approximately \$39.8 billion (4.4 trillion).

Japan's energy storage sector is expanding, though growth remains uneven across segments. The overall market is expected to grow 11% annually, from USD 793.8 million in 2024 to USD 2.5 billion by 2035. Residential adoption is moving faster. Home lithium-ion battery systems generated USD 278.5.

What energy storage products are exported to Japan?

Japan plays a pivotal role in the global energy market, particularly in the domain of energy storage products. 1. Japan is a leading destination for

innovative energy storage technologies, 2. The country imports various types of batteries. What are the major oil and energy companies in Japan?

Oil and energy companies in Japan are a vital part of the country's economy, providing essential resources for the manufacturing and transportation sectors. These companies include major players such as Japan Petroleum Exploration (Japex), Japan Oil, Gas and Metals National Corporation (JOGMEC), and Mitsubishi Corporation.

Where does oil come from in Japan?

Most crude oil imports to Japan came from Middle Eastern countries such as Saudi Arabia and the United Arab Emirates. Nevertheless, the oil consumption in Japan has decreased significantly since 1995. It only shortly increased after the nuclear disaster in Fukushima in 2011, when nuclear energy was replaced by fossil fuels.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Why does Japan rely on imported energy resources?

Japan's reliance on imported energy resources makes these companies an important contributor to the country's energy security. In addition, they are increasingly focused on renewable energy sources and investing in technologies such as solar and wind power.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Who owns Himeji energy storage facility?

The company is in the joint venture (JV) Himeji Energy Storage Facility together with SMFL Mirau Partners, a subsidiary of Sumitomo Mitsui Finance

and Leasing Corp, chemicals trading firm NAGASE and renewable energy developer RENOVA Inc.
