

# **Wind solar storage supplier quotation in Brazil 2026**

## Overview

---

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

How much does a solar project cost in Brazil?

Overall, 75,250 MW have registered with Brazil's state-owned energy research firm EPE to take part in the bidding process. Of this, 73,256 MW is wind and solar. For projects without a contract, the initial price will be BRL 315 per MWh for hydro and biomass-fired, and BRL 225 per MWh for solar and wind.

What are China's solar plans for Brazil?

The company's plans also include approving the first solar projects, which should total around 1 gigawatt of installed capacity. Chinese money is expected to flow to Brazil from state-owned companies, especially State Grid, which won 80% of the last transmission auction.

How much does a 4 MW project cost in Brazil?

Dubbed A-4, the auction will contract hydro, wind, solar and biomass-based thermal power projects. The highest maximum bidding price is BRL 315 (USD 62.8/EUR 59.4) per MWh. Overall, 75,250 MW have registered with Brazil's state-owned energy research firm EPE to take part in the bidding process. Of this, 73,256 MW is wind and solar.

How much energy is invested in renewable sources in Brazil?

The amount corresponds to investment in large generation plants, of which 34% are related to renewable sources, such as wind and solar, currently the drivers of the Brazilian electricity sector growth.

Why does Brazil conduct solar power auctions?

Brazil typically conducts auctions to secure power capacity for periods when demand peaks but supply diminishes, such as late afternoons – a time when solar power production declines. The June 2025 auction, exclusively for batteries and storage systems, is the first time the government allows such technologies to participate.

## Wind solar storage supplier quotation in Brazil 2026
