

Wiring diagram for solar panel to battery

Overview

How do you connect solar panels to a battery system?

How you connect solar panels to battery systems depends on your voltage requirements: Series wiring adds voltages while maintaining the same current. Connect the positive terminal of one panel to the negative terminal of the next. This configuration works well for MPPT controllers and higher system voltages.

What is a solar panel wiring diagram?

A solar panel wiring diagram (also known as a solar panel schematic) is a technical sketch detailing what equipment you need for a solar system as well as how everything should connect together. There's no such thing as a single correct diagram — several wiring configurations can produce the same result.

How do I connect my solar panel to my inverter?

Solar Panel to Charge Controller: Connect your solar panel to your charge controller. This is where the power generation starts. Charge Controller to Battery: Connect your charge controller to your battery. The charge controller will regulate the power and charge your battery. Battery to Inverter: Connect your battery to your inverter.

How do I connect a charge controller to a solar array?

Turn the charge controller on: it should be able to measure the charge of the battery. In the user manual of a charge controller, there should be a wiring diagram, which you can consult if in doubt. It's advised to wire the controller to the battery first before connecting it to a solar array.

How to wire solar panels?

In the first step, you will wire the battery to a charge controller. It is essential to wire this component before you wire the solar panels. If you wire the solar panels to your charge controller first, the fuse of the charge controller might

blow. If your charge controller has no replaceable fuse, you can't use it anymore.

Can I wire a 12V solar panel in parallel?

If you're planning to wire a 12V system in parallel, download our solar panel wiring diagram PDF below. If you're using a 24V battery bank and a 24V inverter, you'll want to bring your solar panel voltage up to 24V as well.
